SIDDHANT GUPTA

FULL STACK DEVELOPER | BACKEND & DISTRIBUTED SYSTEMS | AI APPLICATIONS

Bhopal, MP, India • +91 62632 11405 • siddhantgupta797400@gmail.com • linkedin.com/in/siddhant62632 • github.com/siddhant1232

EDUCATION

Technocrats Institute of Technology — Bhopal, Madhya Pradesh, India **| August 2023 – May 2027**
Bachelor of Technology (B.Tech) in Computer Science and Engineering
Core Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Database Systems, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Codec Technologies India — *Full Stack Developer Intern* **| October 2025 – December 2025**
Tech Stack: React.js, Node.js, Express.js, Stripe, Clerk, JWT, AWS EC2, Amazon S3

- Developed 8 reusable React.js components across 6 modules of an e-commerce platform using modern ES6+ patterns.
- Integrated 3 production APIs, including Stripe payment workflows, Clerk authentication, and JWT-based role authorization.
- Developed backend REST APIs using Node.js and Express.js for gamification and digital wallet features.
- Collaborated with a 3-member development team, addressing code review feedback and resolving cross-browser UI issues using Chrome DevTools.
- Prepared production-ready code for deployment on AWS EC2 and integrated Amazon S3 for application asset storage.

FEATURED PROJECTS

Multi-Agent Research & Report System | Python, LangGraph, Google Gemini API, Pydantic | github.com/siddhant1232

- Architected an autonomous 3-agent orchestration pipeline using LangGraph (Planner, Researcher, Synthesizer).
- Enforced structured state handoffs through typed Pydantic schemas instead of unstructured free text.
- Engineered resilient API client with exponential backoff retry logic and built 100% offline-runnable unit test suite.

Distributed API Rate Limiter & Microservices Platform | Node.js, Express, Redis, PostgreSQL, MongoDB, Docker, BullMQ | github.com/siddhant1232

- Designed high-throughput Redis-backed distributed rate limiter implementing Token Bucket, Fixed Window, and Sliding Window algorithms.
- Containerized microservices mesh (API Gateway, Auth, User, and Notification services) with JWT authentication.
- Integrated BullMQ with Redis for asynchronous background job processing, isolating compute-intensive notifications.

Conciso — AI PDF Summarizer | Next.js, TypeScript, PostgreSQL, AI APIs | github.com/siddhant1232

- Developed full-stack Next.js and TypeScript application with responsive UI and reusable component architecture.
- Implemented multi-stage document chunking and summarization workflow capable of processing technical documents exceeding 50 pages.
- Integrated indexed PostgreSQL persistence layer for session caching, document metadata, and generated summaries.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Mobile-First Design
- **Backend:** Node.js, Express.js, REST APIs, Microservices Architecture, JWT Authentication
- **Databases:** PostgreSQL, MongoDB, Redis, ChromaDB, Firebase
- **DevOps & Cloud:** Docker, AWS EC2, AWS S3, Git, GitHub Actions
- **AI & Engineering:** Google Gemini API, Retrieval-Augmented Generation (RAG), Prompt Engineering, System Design, Debugging

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon 2025 (National Round): Presented hardware solution at IIT Roorkee as part of a 6-member team, advancing past college-level selection to national finals.
- Hack-AI-thon (SBI Life): Designed 4 wireframes for AI-driven UI/UX redesign of SBI Life platform, built functional webpages, and presented to 2-judge panel.
- NPTEL Certification — Programming in Java: Completed elite-level proctored national certification covering OOP, multithreading, and collections framework.
